

## KEMIKO CONCRETE STAINS & TOPCOATS

### PRICE AND COVERAGE SHEET

*A PATH GUIDE, AT THE END OF THIS SHEET, WILL AID IN PRODUCT SELECTION.*

#### Neutra Clean

Neutra-Clean is an industrial strength, high performance water base cleaner for the preparation of bare concrete and coated substrates. It is typically applied to concrete substrates to remove matter such as grease, grime, soil, wall plaster, and other construction related residue.

Coverage: 500-2,000 sq ft per gallon – per application  
Price: \$10.95 per gallon

#### Stone Tone Stain

Kemiko Stone Tone Stains are not paint, pigment or coating stains. Kemiko's staining process will create a natural stone or mottled appearance. They are made from an acid solution, wetting agents and metallic ions, and when mixed with water reacts (chemically combines) with the lime in concrete to form permanent, long lasting colors that will not fade, chip, or peel. Because this is not an exact pigmented coloring technique, the results cannot be guaranteed. The product is guaranteed to be manufactured properly. Stains are best applied with an all-plastic, garden-type pump-up sprayer.

Coverage: 400 sq ft per gallon when applying the recommended two applications.  
Price: \$57.65 per gallon **Caution - HIGHLY CORROSIVE**

#### Stone Tone Wax (Buff-On)

Kemiko Wax is designed for use on porous surfaces (primarily interior) that are unaffected by contact with mineral spirits, such as new and old concrete, unglazed brick and tile, flagstone and unsealed wood. Wax enhances the depth of color and provides surface protection. The wax is water and dirt resistant. Wax is best applied with a slow speed floor machine (175 rpm), using a natural, stiff bristle brush (Bassine) attachment and a natural medium bristle brush (Palmyra, Tampico or Union Mix) attachment for buffing.

Coverage: 300 sq ft per gallon depending on the porosity of the concrete.  
Price: \$37.95 per gallon **Caution - COMBUSTIBLE**

## **Stone Tone Sealer II (Gloss or Flat)**

Kemiko Stone Tone Sealer II is a high solids (30%) water base acrylic urethane sealer with excellent wear qualities. It is designed for interior and exterior use and is non-yellowing and resistant to blush. Stone Tone Sealer II provides a natural looking satin finish to surfaces requiring a durable clear coating. It is suggested two thin coats be applied instead of one thick coat. The surface dries within 2 - 3 hours, however, heavy traffic should be avoided for 24 hours and washing avoided for 48 hours. Sealers are best applied with conventional commercial air spray or airless spray equipment, utilizing gun tip size between .013”-.015”; however, professional pump-up sprayers, rollers, lambs wool pads and micro-fiber pads are optional application methods for trained professionals.

Coverage: 250-300 sq ft per gallon depending on the porosity of the concrete.  
Price: \$42.95 per gallon

## **Easy Shine Mop-On Wax**

Kemiko’s Easy Shine Wax is a water-based acrylic polymer mop-on floor finish formulated to protect and minimize the scratching of Kemiko and Sta-Crete sealers. This maintenance product may be applied by spraying it on the surface then massaging in a figure eight motion with a micro-fiber pad. A minimum of two coats is recommended and the drying time is 20-30 minutes.

Coverage: 1,500 – 2,000 sq ft per gallon per coat.  
Price: \$38.65 per gallon

## **Sta-Natural Water Repellent Sealer**

Kemiko Sta-Natural Sealer is a 0-VOC, extremely user-friendly silane/siloxane emulsion for sealing concrete and cementitious substrates. It is designed to repel water, reduce efflorescence and allows the substrate to breathe. It is resistant to UV and high alkalinity exposure.

Coverage: 80 - 150 sq ft per gallon depending on the porosity of the substrate.  
Price: \$46.95 per gallon

## **Epoxy Sealer**

Epoxy Sealer is an excellent, two-part sealer. With great self-leveling qualities and extensive pot life, this durable coating is recommended for professional application. Epoxy Sealer is applied to properly prepared, stained or bare interior concrete by spray, roller or brush.

Coverage: 350 sq ft per gallon, per coat depending on the porosity of the substrate.  
Price: \$64.20 per gallon

## **Polyurethane Sealer**

Polyurethane Sealer is a waterborne, 0-VOC, UV resistant two-part sealer. Polyurethane Sealer is used on surfaces requiring color retention, graffiti abrasion, and chemical resistance.

Coverage: 400 sq ft per gallon, per coat  
Price: \$151.20 per gallon

## **Easy Strip**

Easy Strip is a high performance water base wax stripper designed specifically for removing Kemiko Stone Tone and Easy Shine waxes. Easy Strip is concentrated and easily removes wax build up in domestic and commercial kitchens, grocery stores, restaurants, showroom floors, walkways, and other surfaces.

Coverage: 200-500 sq ft per gallon, per application  
Price: \$23.65 per gallon

## **THE PATH TO BEAUTIFUL DECORATIVE CONCRETE – Product Selection Guide**

Kemiko suggests you view your project and the use of Kemiko products as a “The Path to Beautiful Decorative Concrete”. Please consider the following options, THEN CHOOSE A PATH. (Path choice may be based on use of surface and desired appearance.)

Keep in mind the path, or process, will be the same for most projects from step one through step three. It is at step four where you must make a decision as to which product to use on the surface.

Kemiko Rocky Mountain, dba The Ader Image is available to help guide you through this process at 303-286-8111.

<b>Interior Projects</b>	<b>Appearance</b>	<b>Step One Floor Preparation</b>	<b>Step Two Stain</b>	<b>Step Three Residue Removal</b>	<b>Step Four Protection Coat</b>	<b>Step Five Finish (Interior)</b>

### **Retail and Commercial Projects**

Contact your Kemiko Dealer for a full line of Kemiko Products and Sta-Crete Sealers and Epoxies.

NOTE: Should you have questions regarding the application of Kemiko products, we encourage you to call and discuss them with us. If you are interested in having your project done professionally, please go to our website [www.kemiko-rockymtn.com](http://www.kemiko-rockymtn.com) under Installers or contact us for an installer directory.

## **Samples**

All products may be purchased as follows:

1/2 Pint = \$10.95      Quart = \$20.95      1/4 Pint Sample Kit = \$35.95

## **How-To Instructional Video**

Price: \$25.95

With product order: \$21.95

## **Shipping and Handling**

Some Kemiko Products are classified as 'Hazardous Materials'. Shipping and handling costs vary (\$30.00-\$150.00), based primarily on product, quantity, shipper and destination. UPS requires gallons be broken down into liter bottles, creating added expense, yet UPS still may cost less than a regular freight company. We will always attempt to find the least expensive carrier to deliver you products. Please request a quote if a precise rate is desired.

## **Return Policy**

We will accept returned product as long as it is unopened and returned within 30 days. A 20% restocking fee will be deducted from any refund.

## **Warranty**

The following warranty is made in lieu of all other warranties, either expressed or implied. The products are manufactured of selected raw material by skilled technicians. Neither seller nor manufacturer has any knowledge or control concerning the purchaser's use of the products and no warranty is made as to the results of any use. The only obligation of either seller or manufacturer shall be to replace any quantity of these products proved to be defective. Any claim of defective product must be received in writing within one (1) year from the date of shipment. Neither seller nor manufacturer assumes any liability for injury, loss or damage resulting from the use of these products.

**HAZARDOUS MATERIALS - KEEP OUT OF REACH OF CHILDREN**
